

Power Cord DON'T Dos

(For additional information, please contact Env. Health & Safety, 885-6524)

1. Multi-Plug

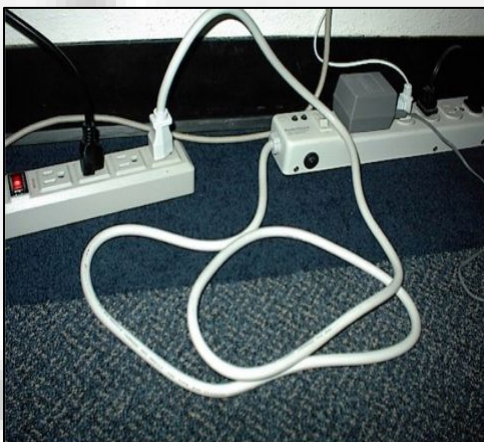

2. Extension Cords

3. Home-made

1. Multi-plug adapters must be circuit protected and cannot be connected to power strips.
2. Extension cords are for temporary use only and must be unplugged after each use.
3. Homemade extension cords may not be used unless fabricated and approved by a qualified electrician.
4. Power strips must be circuit-protected and must be plugged directly into wall outlets – they may not be “Daisy-Chained” (plugged into another power strip or multi-plug adapter).

4. Daisy-Chain

The Problem

The Result!!!
