In order to handle your request in an accurate and speedy fashion, it is essential we have lots of information and a good sample. Without them, your request will be delayed until we get what we need to serve you with accurate information.

Please fill out all forms *completely*.

Plant and Weed Identification

- Samples should include flowers or fruit, leaves and stems
- For woody trees and shrubs, submit a 1-2 foot section of a branch
- For non-woody (herbaceous) plants, submit an entire plant if possible
- Wrap plants in a DRY paper towel and place in a gallon Ziploc bag

Plant Problem Samples

- Submit several plant parts with varying degrees of severity
- Include one healthy sample if possible
- If a branch is partially affected, bring in a section where it changes from healthy to unhealthy
- Wrap plants in a DRY paper towel and place in a gallon Ziploc bag

Insect Identification

- Submit several specimens if possible
- Freeze the insect before bringing it in the office
